THE STATE OF NEVADA.

0800

PROOF OF THE APPROPRIATION OF WATER.

State your name W. M. McGee

1. Q. Postoffice.

A. City, Nevada.

2. Q. State the use to which the water has been applied.

A. watering stock & domestic purposes.

3. Q. State the means of diversion employed.

A. by means of pipe and water trough.

4. Q. If through a ditch state its name.

A. Gleason Creek trough.

5. Q. (a) State date of survey of the ditch or other distributing works through which the water claimed is diverted. (b) The date when the construction of such ditch was begun and when completed.

A. (a) _____

(b) 1901

6. Q. If any enlargements were made state the date when begun and the date when completed.

A. _____

7. Q. State dimensions of the ditch as originally constructed, and as enlarged.

A. 12x12x length 225 feet

8. Q. State the name of person, association of persons or corporation who built the ditch or canal, and the name or names of its present owners.

A. Adam McGee

9. Q. State the nature of your title to the land for which an appropriation is claimed, and if not owned by you give the name of the owner and the nature of the possessory right which you exercise.

A. possessory title being located upon unreserved land

10. Q. State the year when water was first used for irrigation or other beneficial purposes, and by whom. If for irrigation, give the number of acres watered the first year, with the legal subdivisions on which the water was used, and as near as may be the acres irrigated in each legal subdivision.

A. By Martin Gleason in 1873. was used for setting a station known as Summit station on the Sacchar Valley road which was located in wagon. It was also used for watering stock.

11. Q. State the number of acres watered each subsequent year, and give the legal subdivisions on which the water was used, and as near as may be the acres irrigated in each legal subdivision.

A. The water is used for stock purposes only since 1880.

12. Q. If water is claimed for irrigation, give the legal subdivisions of land owned or controlled by you for which an appropriation is claimed.

A. See 11

13. Q. State the acreage said ditch is capable of watering, give the legal subdivisions of land which it can be made to irrigate, and state who owns said land.

A. See 11

14. Q. State the character of the soil and the kind of crops cultivated.

A. See 11

15. Q. Are you an owner in said ditch? If so state your proportionate interest therein.

A. Yes one half interest.

16. Q. The plat prepared by the State Engineer is hereby accepted as showing correctly the location of the _____ Ditch and the land which can be irrigated therefrom.

A. _____

17. Q. When does your irrigation season begin and when does it end?

A. The entire year

18. Q. If water is used for other purposes than irrigation, state the nature of such use, the time when such use began, and how much water is required for such purpose.

A. for stock only

19. Q. During what months is the water used?

A. entire year

20. Q. Have you had sufficient water each year since the use for which an appropriation is claimed began? If not, state the years of scarcity, the months when the supply was insufficient, and the reason of such scarcity.

A. by aid of water troughs there is ample for stock

Signed:

W. M. Gleason

Ely, Nevada, June 1st, 1910.

Sworn to and subscribed before me at Ely, Nevada, this First day of June, 1910.

J. M. Lockhart, Notary Public.

Remarks:

Gleason Springs is situated about 3 miles East from Summit station on Hamilton Ely road, about two miles South of Springs at Bonville Creek and about 12 miles ^{South} from Copperflat. Was originally owned by Martin Gleason, and has passed by deed through various owners to the present owner Adam McGill.

The water of this spring has been materially increased by means of a cut run laterally through the cañon which cut is on the bed rock an underdrain was then placed in the cut and refilled. The water flows out through the under drain to ditches which are 225 feet in length. The cut is about 300 feet in length and was made at a cost of \$300 by Adam McGill.

These improvements were kept up by work being performed annually, such as repairs on boxes opening and drain.

During the early portion of the year there is quite a stream of water flowing through the cañon but in later part of year it diminishes so that there would be a quantity entirely insufficient for water stock only that the above improvement had been made.

The above springs are on the "Shot" range
