Final proof of beneficial use of water appropriated in accordance with this permit rendered

NEVADA STATUTES REGARDING APPROPRIATIONS OF WATER.

SEC. 24. Any person, association or corporation desiring to appropriate any of the public waters, or to change the place of diversion or manner of use of water now appropriated, shall before performing any work in connection with such appropriation make an application to the State Engineer for permission to make the same. Said application shall set forth the name and postoffice address of the applicant, the source from which said appropriation shall be made, the amount thereof, location of proposed works in connection therewith, the purpose for which the appropriation is desired, and if for irrigation a description of the land to be irrigated and the area thereof, and any additional facts required by the State Engineer. On receipt of this application, which shall be of a form prescribed by the State Engineer and to be furnished by him without cost to the applicant, it shall be his duty to make a record thereof in his office, and to carefully examine the same to ascertain whether it sets forth all facts necessary to determine the nature and amount of the proposed appropriation. If the application be defective it shall be the duty of the State Engineer to return the same to the applicant for correction, and sixty days shall be allowed for the refile thereof. If refiled, corrected in proper form, within such time, the application shall, upon being accepted, take priority as of date of original filing subject to compliance with the further provisions of the law and the regulations thereunder. *Stats. 1907, p. 35.*

SEC. 25. If not corrected as required, no further proceedings shall be had on such application, but when filed in compliance with this Act, the State Engineer shall within thirty days at the expense of the applicant, to be paid in advance, publish or cause to be published in some newspaper having a general circulation within the boundaries of the river system or water system or water source from which said appropriation is to be made, a notice of the application, showing by whom made; the quantity of water sought to be appropriated; the stream from which the appropriation is to be made, and at what point on the stream; the use for which it is to be appropriated, and by what means, which notice shall be published once a week for four weeks. Any person, corporation or association interested may, at any time within thirty days after completion of the publication of said notice, file with the State Engineer a written protest against the granting of said application, stating the reasons therefor, which shall be duly considered by said Engineer. He may, in his discretion, hear evidence in support of or against such application and shall take such action thereon as he may deem proper and just. But vested rights to the use of such waters shall in no wise be lost, prejudiced or impaired by failure to protest against an application to appropriate the same under this Act. *Stats. 1907, p. 36.*

SEC. 26. If there is no unappropriated water in the source of supply or if such change of place of diversion or manner of use will in any substantial way invade or impair the rights of other appropriators the State Engineer shall refuse such appropriation, endorse his refusal upon the application, make a record of his refusal and endorsement in his office, and return the application so endorsed to the applicant, who shall not prosecute the work under his application so long as such refusal shall be in force, under penalty of being deemed guilty of and punished for a misdemeanor. If there is unappropriated water in the source of supply named and the appropriation is not detrimental to the public welfare or the proposed change of place of diversion and manner of use will not invade or impair the rights of other appropriators, the State Engineer shall approve the application and set a date prior to which work of diversion and appropriation must be begun and a date prior to which such work must be completed, endorse such approval upon the application, make a record of such approval and endorsement in his office, and return the application so endorsed to the applicant, who shall, on receipt thereof, be authorized to take such measures as may be necessary to perfect such appropriation; *provided, however,* that the State Engineer may approve an application for a less amount of water than that named in the application. Any person changing his place of diversion or manner of use as specified in this Act shall not thereby lose any priority of right upon the stream he may have heretofore acquired. *Stats. 1907, p. 36.*

SEC. 28. Upon the approval of an application in whole or in part, the applicant shall send to the State Engineer within six months thereafter a map on a scale of not less than two inches to the mile, showing the location of the works necessary to perfect the appropriation, the source of appropriation, and if for irrigation, the land upon which the water is to be applied, which map shall be filed in his office. *Stats. 1907, p. 37.*

SEC. 30. Any person interfering with, obstructing or resisting the State Engineer, Assistant Engineer or any Water Commissioner, in the performance of his duty or duties as prescribed by this Act, or by the rules or regulations adopted by the Board of Irrigation, shall be deemed guilty of a misdemeanor. *Stats. 1907, p. 37.*

SEC. 31. Any act which is made a misdemeanor by this statute shall be punishable by a fine not exceeding one hundred dollars (\$100), or by imprisonment in the county jail not more than three months, or by both such fine and imprisonment in the discretion of the Court. *Stats. 1907, p. 37.*
