Total 470.01

Aggregate acreage of 470.01 acres is the amount now irrigated. Original acreage was smaller, but was increased from year to year, comencing with original appropriation, and the entire acreage was irrigated by the year 1878 or thereabouts. The original diversion was sufficient for the entire acreage and was made with the intention of irrigating the entire acreage. Reasonable diligence was exercised in increasing the acreage until same was entirely irrigated, and the water right is entitled to relate back to the original diversion for the priority of the entire acreage.

(14) The additional number of acres first irrigated in subsequent years was as follows:

(15) The maximum acreage irrigated in any year was 470.01 acres.  
 but in some years about 160 A. additional irrigated in NW 1/4 Sec. 36, T19N, R66E

(16) The water claimed has ~~(has not)~~ been used for irrigation each and every year since the right was initiated.  
 Strike out one not wanted

(17) The years during which no water was used for irrigation or during which the full water right was not used were None  
 If water was not used, or used in reduced quantity at any time, full information as to causes and duration

..... of non-use should be given, appending a sheet if necessary

(18) The claimant's water right was (was not) recorded in the office of the County Recorder of ..... County, said record being at page ..... of Book ..... of ..... and being a claim for ..... of water for the irrigation of ..... acres of land in the following legal subdivisions: .....

Do not know if right recorded.

NOTE—Failure to record in the county in no way invalidates a water right, but if ditch or right was so recorded, supply full information under (19)

(19) The maps provided by ~~the State Engineer~~ and attached hereto as a part of this proof ~~is~~ hereby accepted as correctly showing the ditch lines or irrigation works diverting or conveying the water claimed and the lands irrigated.

(20) Water from the source given and through the works described is also used for the following purposes other than irrigation: Stock watering and domestic use

(21) The character of the soil is sandy loam. The soil needs 6 acre-feet (Sandy, gravelly, loam) per annum to properly irrigate the crops. A continuous flow of cubic feet of water per second, during the irrigation season of months, is needed to irrigate each 100 acres of land.

(22) Remarks: Said water from Bassett Creek is required for the irrigation of said land in addition to and as augmented by the waters of numerous springs on said land. Said springs are in turn augmented by said creek.
