(20) Water from the source given and through the works described is also used for the following purposes other than irrigation: for domestic uses and watering of stock

(21) The character of the soil is alkali-land in a slough. The soil needs.....acre-feet do not know the acre-feet ^(Said of acre-feet to be) needed, land is marshy per annum to properly irrigate the crops. A continuous flow of.....cubic feet of water per second, during the irrigation season of.....months, is needed to irrigate each 100 acres of land.

(22) Remarks: The land is easily irrigated as the general character..... of the land is swampy and during the winter months the water is not needed at all on the land, there is more than enough water for the land which is now used to raise wild hay. The main ditch runs northerly and southernly and the springs are connected with this ditch by lateral ditches which collect the water from the springs and diverts it to the main ditch.
