Remarks:

This spring was first used by Charles H. Odgers in 1900 for watering his sheep and cattle, and he subsequently sold it with his range and land to Casten Olsen who sold it in turn to this claimant in 1906, and this claimant has used it exclusively ever since for watering his sheep.

Each year this claimant has cleaned out the spring and has repaired the dam and reservoir so as to make it a better place and better suited for the purpose of watering his sheep.

This is one of a series of small springs and while none of them is sufficient to water a large herd, by combining them and ranging the sheep from one to the other, sufficient water is secured to water a good sized herd.
