The waters of ditches 15 and 16, after having passed over and irrigated the said lands in the south half of the SE $\frac{1}{4}$  of Sec. 7, and the N $\frac{1}{2}$  of the SE $\frac{1}{4}$  of Sec. 7, intermingle with the waters of Braase Creek as spread out over the land, and the intermingled waters thus mentioned and described, following the lower lands and shallow channels, are diverted, guided and controlled by claimants' ditches Nos. 18, 19 and 20, spread out over the surface of the land and pass off in a southerly and easterly direction, constituting a general plan and regulated scheme of irrigation heretofore and now maintained by the claimants to irrigate lands in the SW $\frac{1}{4}$  of Sec. 8. After flowing over and beyond said lands in the SW $\frac{1}{4}$  of Sec. 8, these waters meet and intermingle with waters diverted from and otherwise flowing from Williams Creek, and this intermingled water, spreading out and over the surface of the land ~~and~~ continue on and over, and constitute a general plan and regulated scheme of irrigation heretofore and now maintained by claimants to irrigate the lands in the N $\frac{1}{2}$  of N $\frac{1}{2}$  of Sec. 17; all of said lands being in T. 35 N., R. 62 E. The lands within the legal subdivisions above described, which are irrigated by the irrigation scheme and system herein described, comprise approximately 290 acres.
