(17) The years during which no water was used for irrigation or during which the full water right was not used were

If water was not used, or used in reduced quantity at any time, full information as to causes and duration

of non-use should be given, appending a sheet if necessary

(18) The claimant's water right was (was not) recorded in the office of the County Recorder of

County, said record being at page of Book of

....., and being a claim for

..... of water for the irrigation of

acres of land in the following legal subdivisions:

NOTE—Failure to record in the county in no way invalidates a water right, but if ditch or right was so recorded, supply full information under (19)

(19) The map provided by the State Engineer and attached hereto as a part of this proof is hereby accepted as correctly showing the ditch lines or irrigation works diverting or conveying the water claimed and the lands irrigated.

(20) Water from the source given and through the works described is also used for the following purposes other than irrigation: Stockwatering & Domestic Purposes

(21) The character of the soil is Sandy loam The soil needs 3 acre-feet
(Sandy, gravelly, loam)
per annum to properly irrigate the crops. A continuous flow of One cubic feet of water per second, during the irrigation season of Seven months, is needed to irrigate each 100 acres of land.

(22) Remarks: Owing to the loose sandy condition of the soil the ditches run through, a large amount of water is required at the head of the ditches to supply sufficient water to irrigate the crops.
