(11) The amount of water which has been necessary to be diverted for this purpose has been.....
All the source produces which varies from summer to winter
..... cubic feet per second.
448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at [redacted] NW 1/4 SW 1/4, NE 1/4 SW 1/4, and SW 1/4 NW 1/4 Section 33, T20N., R54E.

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed

This set of springs flows from a series of outlets along the Dry Canyon Wall
land, it should be stated.
in section 33

Remarks This spring has been used to water livestock for over 100 years. It is an
important source of water for the operation of the ranch. The location is such
that the grazing allotment can be more fully utilized from this water source. The
spring is cleaned out from time to time when necessary, by ranch foreman, in order
to maintain the flow.

Remarks The Four Eyed Nick Springs are commensurate to the land that John Hancock filed for application of patent in 1894, at the Division of State Lands Office in Carson City, Nevada. They are located within the grazing allotment of the ranch.

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by United Dressed Beef, Inc. are full and correct to the best of his knowledge and belief.

Donald D. Eldridge - Agent

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the claimant.
