NOTE—Failure to record in the county in no way invalidates a water right, but if ditch or right was so recorded, supply full information under (17)

(18) Water from the source given and through the works described is also used for the following purposes other than irrigation: Domestic

(19) The character of the soil is loam <sup>4 1/2</sup> acre-feet per acre per annum have been used to irrigate the crops. A continuous flow of ~~200~~ <sup>gallons per foot</sup> cubic feet of water per second has been used to irrigate about 1/2 acres of land.

(20) Remarks: Remark #1: Annex "A" to this document and made a permanent part hereof, is an attestation establishing a known date of the well's existence, usage, characteristics of the water source and a minimum period of time of being "in service".  
Remark #2: this supplements the explanation of item (16). To my knowledge, the water right was not fully used in the years mentioned due to the reason(s) that because of the proximity of city and other operable wells, the water level in the subject well at times fell below the lift capability of the installed centrifugal system thereby making water unavailable at time(s) of need. It is therefore essential that the present well will be replaced with one of sufficient size and capacity to support a pumping plant capable of meeting all foreseeable needs under this appropriation.

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by the claimants are full and correct to the best of <sup>their</sup> his knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the

claimant
