Ending point of diversion was obtained by intersections of USGS hydrographic data (from 1986 USGS mapping data) with Public Land Survey System (PLSS) data obtained from the Nevada BLM Geographic Coordinate Data Base (GCDB). The accuracy of this point varies from +/- 40 feet to +/- 200 feet in relation to the accuracy of the USGS and PLSS data in each area. This ending point is intended to represent where the stream intersects the property boundary line.

The location of the beginning Point of Diversion (POD), the referencing section corner as well as a Point along the Stream (POS), were determined in the field with Global Positioning System (GPS) equipment. Accuracy is within +/- 15 feet. GPS locations are as follows:

POD B1: 41° 58' 28.125" N. lat. Geoid Altitude 6,245.31 feet.
