and range of public survey. If on unsurveyed land, it should be stated.

Remarks This right and other water rights, for livestock grazing and wildlife, common to the same grazing allotment shall be limited to the quantity of water beneficially used within the allotment.

The beginning and ending points of diversion were obtained by intersections of USGS hydrographic data (from 1986 USGS mapping data) with Public Land Survey System (PLSS) data obtained from the Nevada BLM Geographic Coordinate Data Base (GCDB). The accuracy of these points vary from +/- 40 feet to +/- 200 feet in relation to the accuracy of the USGS and PLSS data in each area. These beginning and ending points are intended to represent where the stream intersects the property boundary line.

The location of the referencing section corner was determined in the field with Global Positioning System (GPS) equipment.

Accuracy is within +/- 15 feet. GPS locations are as follows:

SW Corner Sec.17 41° 57' 20.0" N. lat.

T.47N. R.60E. 115° 13' 11.9" W. long. (A4-2)

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by United States of America are full and correct to the best of his knowledge and belief.

Deponent represents claimant by virtue of appointment as the Acting State Director of the Bureau of Land Management in Idaho.
