Remarks This right and other water rights, for livestock grazing and wildlife, common to the same grazing allotment shall be limited to the quantity of water beneficially used within the allotment.

Beginning and ending points of diversion were obtained by intersections of USGS hydrographic data (from 1986 USGS mapping data) with Public Land Survey System (PLSS) data obtained from the Nevada BLM Geographic Coordinate Data Base (GCDB). The accuracy of these points vary from +/- 40 feet to +/- 200 feet in relation to the accuracy of the USGS and PLSS data in each area. These beginning and ending points are intended to represent where the stream intersects the property boundary line.

The location of the referencing section corner as well as several Points along the Stream (POS), were determined in the field with Global Positioning System (GPS) equipment. Accuracy is within +/- 15 feet. GPS locations are as follows:

SW Corner: Sec.18 41° 57' 17.821" N. lat. GEOID Altitude 6,499.40 ft.
T.47N. R.57E. 115° 35' 21.012" W. long. (26-1)
