**Attachment -- Remarks****Page 1 of 2****Proofs of Appropriation****Claimant: Horgan – 1996 Family Limited Partnership****Priority:**

The US General Land Office official survey plat for Township 24 North, Range 21 East signed January 19, 1888 documents cultivated fields on properties owned by the Claimant. The field survey for this township was conducted on May 15 & 16, 1884 confirming the existence of cultivated fields along Harscable Creek and within properties now owned by the Claimant. The existence of cultivated fields in May of 1884 also confirms the existence of livestock and their use of water from this source.

Refer to the affidavit signed by Jack Horgan to further describe the historical events associated with the Hardscrabble Ranch and the use of water from spring sources for livestock.

**Stock Water Estimated Demand:**

The amount of water utilized from this source for stock watering purposes is calculated as follows:

- Cattle (175 head) and horses (30 head) consume approximately 20 gallons per day per animal for a total daily demand of 4,100 gallons per day per year.
- Sheep (15 head) consume approximately 4 gallons per day per animal for a total daily demand of 60 gallons per day per year.
- The annual volume of water estimated for stock watering purposes is 4.7 acre feet per year.

**Quasi-Municipal Estimate Demand:**

The House Spring provides water service to four homes. In addition to the four homes, there were 16 cabins occupied by divorcees and/or ranching staff. The cabins do not have water or bathroom facilities. A centralized kitchen, laundry, toilet and bath house facility was utilized by the occupants of the cabins. The amount of water utilized for quasi-municipal purposes is calculated as follows:

**Attachment****Page 2 of 2****Proofs of Appropriation****Claimant: Horgan – 1996 Family Limited Partnership**

- Each of the four homes utilizes approximately 1,000 gallons of water per day for inside domestic uses and outside landscaping. The House Springs provides water to four homes for a total daily demand of 4,000 gallons of water per day per year.
- The 16 cabins do not have water service. The occupants utilize the centralized laundry, toilet and bath house. Meals are provided by a kitchen facility. The estimated demand for water is based on single occupancy or 16 people times a demand of 50 gallons per day per person for meal preparation and cleanup, laundry, toilet and bathing needs. This totals 800 gallons per day per year.
- Landscaping surrounding the cabins and centralized convenience facility is estimated to require 1,000 gallons per day for approximately 180 days each year.
- The annual volume of water estimated for quasi-municipal purposes is 6.0 acre feet per year
