

IN THE OFFICE OF THE STATE ENGINEER OF THE STATE OF NEVADA

FILED  
MAR 15 2011  
STATE ENGINEER'S OFFICE

IN THE MATTER OF APPLICATION NUMBER 53989  
FILED BY Las Vegas Valley Water District  
ON October 17, 1989, 20, TO APPROPRIATE THE  
WATERS OF Underground Source

PROTEST

Comes now Nevada Department of Wildlife

Printed or typed name of protestant

whose post office address is 1100 Valley Road, Reno, NV 89512

Street No. or PO Box, City, State and ZIP Code

whose occupation is and protests the granting

of Application Number 53989, filed on October 17, 1989, 20

by Las Vegas Valley Water District to appropriate the

waters of Underground Source situated in Lincoln

Underground or name of stream, lake, spring or other source

County, State of Nevada, for the following reasons and on the following grounds, to wit:

Pumping of this nature within proximity to wetlands, springs and streams is not environmentally sound, is not in the public interest and will adversely affect existing rights.

THEREFORE the Protestant requests that the application be Denied

Denied, issued subject to prior rights, etc., as the case may be

and that an order be entered for such relief as the State Engineer deems just and proper.

ALL COPIES MUST CONTAIN ORIGINAL SIGNATURE.

The Nevada Department of Wildlife (NDOW) is responsible for protecting, restoring and managing fish and wildlife within the state.

The amount of water applied for under this and associated applications are of sufficient amounts to be likened to the dewatering processes of the mining industry with the exceptions that mining, by its very nature is temporary and the water pumped is generally either returned to the source via rapid infiltration basins or injection wells or the water is used as a substitutive use for irrigation water. All practices either return the water to the source or use the water for beneficial purposes within the basin. None of these practices are to be anticipated, there is no expectation that this project is temporary in nature and all water pumped will permanently leave the basin, effectively providing all of the adverse affects with none of the mitigation of mine dewatering.

The proposed Points of Diversion for the majority of the applications are located on the Bench/Bottom interface. These proposed POD's and the high requested diversion rates will be capturing water from the fracture flow aquifer of the range front as well as the alluvial aquifer of the valley bottom. This could in effect cut off the shallow fracture flows that maintain the springs streams and wetlands in the area as well as change the deeper aquifer flow gradient reducing the artesian flows which also help maintain the springs streams and wetlands in the area. The State Engineer has historically recognized 100 feet as the dividing line between surface water and ground water, however subsurface geomorphology is complex at best and these complexities need to be address to reduce potential impacts on artesian aquifers with surface water expressions. A 100 foot surface seal will likely do little to reduce the impacts on the springs with pumping volumes of this size within close proximity to surface water sources.

Pumping of this nature within proximity to wetlands, springs and streams is not environmentally sound, is not in the public interest and will adversely affect existing rights and therefore must be denied pursuant to NRS § 534.370(5).

It must be noted that the Nevada Department of Wildlife objects to the proposed water exportation project in its entirety but lacks the financial ability to protest all of said applications and are only officially protesting those nearest to its protectable interests.
