- 2. The application and proposed use would conflict with existing water rights and protectable interests in domestic and/or ranch production and/or municipal wells.
- 3. The appropriation and export of water proposed in this application would be detrimental to the public interest on environmental grounds in the basin of origin and in hydrologically connected and/or downwind basins and would be environmentally unsound as it relates to the proposed export basin: Harm to wildlife and wildlife habitat, degradation of air quality, destruction of recreational and aesthetic values, degradation of water quality, degradation of cultural resources, harm to state wildlife management areas and parks and state and federal wildlife refuges and parks.
- 4. The appropriation and export of water proposed in this application would be detrimental to the public interest on economic grounds and would unduly limit future growth and development in the basin from which the export is proposed: undue limitation of future economic activity and growth in the basin of origin; undue economic harm will extend to the economies and communities of downgradient hydrologically connected and downwind basins; loss of public lands grazing and forage.
- 5. The proposed action is not an appropriate long-term use of Nevada's water.
- 6. The Applicant has not justified the need to import water from another basin.
- 7. The Applicant has not implemented a sufficient conservation plan.
- 8. The Applicant has not demonstrated the good faith intent or financial ability and reasonable expectation to actually construct the work and apply the water to the intended beneficial use with reasonable diligence.
- 9. The Applicant has a duplicative application filed in 2010 which may require a duplicative hearing for the same groundwater.
- 10. The appropriation and export of groundwater from Spring Valley will harm existing permitted uses in the hydrologically connected areas including but not limited to Snake Valley and Great Basin NP.
- 11. The appropriation and export of groundwater from Cave, Dry Lake, and Delamar Valleys will harm hydrologically connected areas including but not limited to Pahrnagat and Moapa NWRs, 3 State WMAs, and Pahrnagat and White River Valleys and Lake Mead NRA.
- 12. Protestant reserves the right to amend this protest to include issues as they develop and incorporates other protests to SNWA's applications by reference.

THEREFORE the Protestant requests that the application be DENIED and that an order be entered for such relief as the State Engineer deems just and proper.
