of Application Number 54130, filed on OCTOBER 30 19 89
by BONNEVILLE NEVADA CORPORATION
Printed or typed name of applicant
waters of UNDERGROUND situated in 534, T18S, R63E
Underground or name of stream, lake, spring or other source

County, State of Nevada, for the following reasons and on the following grounds, to wit:

- (1) 85 megawatt cogeneration power plant only requires 311,666 gallons of water per day for 365 days per year. This equates to a well pump rating of .48 cfs (48/100's) for 24 hours per day for 365 days per year.
- (2) Approval of this permit would allow the Applicant to pump approximately 4.76 times more underground water than is required for this size of a combined cycle cogeneration power plant.

THEREFORE the protestant requests that the application be REDUCED FROM 2.3 cfs to .48 cfs.
(Denied, issued subject to prior rights, etc., as the case may be)

and that an order be entered for such relief as the State Engineer deems just and proper.
