66383**

EXHIBIT "A"

The Town of Fernley, in cooperation with the Pyramid Lake Tribe and Washoe County, is presently performing various studies for a Regional Water System in the Fernley/Wadsworth area. The granting of this application could have potential adverse impacts on the proposed principal source of water for this system, and the development and operations of the system, including underground recharge and storage.

If feasible, in lieu of denial at this time, the Town respectfully suggests that the State Engineer continue consideration of this application until the present ongoing studies are completed (approximately two years) and technical information and a regional model are available to evaluate the impacts of the proposed appropriations under this and the related applications.
