\$25 FILING FEE MUST ACCOMPANY PROTEST. PROTEST MUST BE FILED IN DUPLICATE.
ALL COPIES MUST CONTAIN ORIGINAL SIGNATURE.

Exhibit A

The Bureau of Land Management seeks the denial of the following applications for the reasons cited:

Applications 67682 and 67683 were applied for by C. Punch Inc. on June 18, 2001. These applications were submitted along with a number of other applications, by C. Punch, for western Pershing county. Most of the applications were located on private land and were beyond the scope of the BLM's review. These two applications, however, are located on public land and are considered public water reserves (PWR) and not available for appropriation unless there is excess water beyond the requirements of the PWR..

The original intent of the public water reserve was to prevent the monopolization of public land by gaining control of the limited water sources. In this particular case, C. Punch Inc. has indicated their intent to control as many of the water sources as possible. Where these sources occur on private land, the Bureau of Land Management has opted not intervene. The remaining water sources on public land, therefore, become all the more important.

The points of diversion, as described in the applications, are located on the east side of the Selenite range in an area where the bulk of the spring sources are on private land. These sources are located in the Selenite Herd area, and as such, incidental use by wild horses can be expected. Finally, C Punch Inc. has not sought, nor have they received, authorization to develop these sources.
