STATE ENGINEER'S OFFICE
SEP 18 AM 11:26

\$25 FILING FEE MUST ACCOMPANY PROTEST. PROTEST MUST BE FILED IN DUPLICATE.
ALL COPIES MUST CONTAIN ORIGINAL SIGNATURE.

Attachment "A"

1. The application is vague and does not provide enough detail as to the true purpose of the appropriation. It is unclear whether they are seeking hot geothermal waters for a geothermal power plant or cooling waters for a gas or coal fired power plant. It is unclear whether the water will be re-injected or what the total annual duty requested is.

2. The proposed points of diversion are located lands not controlled by the applicant (Smoke Creek Desert, Basin 21) and are some twenty (20) miles from the proposed place of use located in a different ground water basin (San Emidio Desert, Basin 22). This inter-basin transfer will be detrimental to the public interest.

3. The Protestant owns permitted and certificated artesian ground water rights (Permits 51639 – 51642) which have priorities of 1987. These waters are for irrigation, domestic and commercial purposes. The operation relies upon the natural artesian flows from four ground water wells. These wells may cease to flow if the applications are approved given the large proposed diversion rates of 5 cfs and points of diversion located within 2-3 miles of the Protestant's wells. There is no commercially available power at the Protestant's site to pump the wells, therefore if the wells cease to flow naturally, irrigation and commercial use will become impractical.

This application, if granted, will conflict with existing and prior rights held by the Protestant and others in the Smoke Creek Desert.

4. Based on existing and pending applications within the Smoke Creek desert, there is in excess of 55,000 acre-feet of ground water which has either been permitted or applied for with senior priorities. The perennial yield of the basin has been estimated at 16,000 acre-feet per year by the USGS. Therefore there is no unappropriated water in the Smoke Creek Desert. Expanding the Applicant's diversion rate over the entire year for applications 68807 – 68811 results in an annual duty of 18,100 acre-feet per year which in and of itself is in excess of the perennial yield of the basin not considering the existing permitted rights and pending applications with senior priorities.

5. The Protestant reserves the right to amend and add to this protest as new information becomes available regarding the applications.

6. The Protestant hereby reserves the right to adopt the arguments presented in any other protest to these applications.
