Attachment to Protest of Application No. 71207
Filed May 11, 2004 by Nevada Land & Resource Company, LLC of Carson City, Nevada

In general, where soil is suitable and ground water abundant, I am in favor of additional development of land for agricultural use in the White River Valley hydro-geologic basin. However, I protest the granting of this application for the following reasons:

1. Indications are that the water table in all or parts of this alluvial basin is declining. If this is true the cause may be weather related or over-pumping or a combination of both. This application, together with the other two ~~adjoining~~ applications (numbers 71205 and 71206) would have significant impacts if the basin is already being over-pumped.
2. White Pine County is in the process of establishing a comprehensive monitoring program of the underground water tables. It is my belief that a reliable database from monitoring should be in place before any significant new development of underground water resources goes forward.
3. As I understand the situation, there are more applications for water permits in this basin than will ever be granted and they pre-date this application. These earlier applications should merit some reservation of available, if any, underground water.
4. This application is in close proximity to the springs used by both the Lund Irrigation and Water Company and the Preston Irrigation Company. A relatively shallow well (300-1000 feet), based on the applicant's resources, could conceivably tap the carbonate aquifer and have significant impact to those springs.
5. According to the latest County Assessor's records, Nevada Land & Resource Co., LLC only own 240 acres at this location.
