ALL COPIES MUST CONTAIN ORIGINAL SIGNATURE.**

EXHIBIT "A"

Application's 72463 through 72476, 72479 & 72480

The above referenced applications propose to appropriate 20,000 acre-feet of groundwater rights from the Winnemucca Lake Valley.

USGS Open File Report 78-768 estimates the perennial yield of this basin at 3,300 acre-feet. Preliminary data from the State Engineer's Office records indicate existing appropriations of 305 acre-feet. Pending applications 71452 and 71453 also attempt to appropriate 4,000 acre-feet of water from this basin.

Therefore, based on the foregoing:

- 1) There is no un-appropriated water in the source,
- 2) Granting of the applications would conflict with existing rights,
- 3) and could prove detrimental to public interest
