Exhibit "A"
Formal Protest Requesting Denial of Application No. 73308 & 73309
Applicant - Regional Utilites

Application Nos. 73308 and 73309 filed by Regional Utilities proposes to appropriate 3,800 acre feet of ground water from the Smoke Creek Desert Hydrographic Basin No. 21.

Bright Holland Corporation has numerous proofs of appropriations, permits and applications for surface and ground water rights within the Smoke Creek Desert basin. In addition to water rights, Bright Holland Corporation owns an extensive number of acres of land and grazing permits within this Washoe County basin. Both surface and ground water resources are vital to the financial survival of our business.

In order to protect our interests and our continued financial viability, it is important understand what and how water resources are being utilized within the basin or exported out of the basin. It is unknown at this time what impacts the above applications will have on the Bright Holland Corporation water rights and pending applications. Bright Holland Corporation wants to be involved in any hearing, field investigation and/or other action taken by the State Engineer to obtain additional information on possible impacts to existing water rights and pending applications.

Therefore, this protest is being filed requesting denial of the above applications.
