Attachment to the protests of water right application numbers 72695, 72696, 72697,
72698 and 73545, 73546, 73547, 73548, 73549, 73550, 73551, 73552
Submitted by Lloyd Morrison P.O. box 52 Eureka Nevada, 89316

This letter is to inform you that I wish to protest the recent filings for new water rights in Kobeh Valley. This basin does not have that much water available without being over allocated. A basin is considered designated when it is at or close to it's estimated recharge. The certificated and permitted diversions in Kobeh Valley (basin 139) are approximately 16,000 acre feet an additional 17,000 acre feet would substantially over allocate an already designated basin.

The drainage flowing through this valley was also allocated as part of the recharge system for Diamond Valley and reduction of the static head by over pumping in Kobeh Valley could stop the underground recharge of the Diamond Valley basin. This could have a severe impact on the farming district, which has been a stabilizing influence on the Economy of this area.

Sincerely, Lloyd Morrison
