To the Nevada State Engineer:

In regards to water rights applications 77407, We are writing this letter in protest over their application for free water rights.

The company requesting this, is wanting to do something beneficial to the environment and also make a profit. If it was a nonprofit group then we would have no issue with them receiving water rights at no cost for the purpose of geothermal energy.

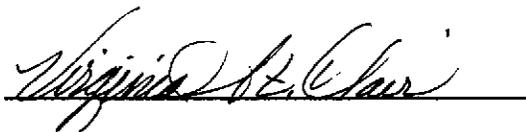

However, they are going to make a profit and are not even an American owned business. So we feel very strongly against them receiving this at no cost when Nevada Farmers receive no assistance for the purchase of their water rights.
