

IN THE OFFICE OF THE STATE ENGINEER OF THE STATE OF NEVADA

IN THE MATTER OF APPLICATION NUMBER 79275
FILED BY Southern Nevada Water Authority
ON January 28, 2010, TO APPROPRIATE THE
WATERS OF Underground

PROTEST

Comes now James Darwin Crammond, Agent for U.S. Fish and Wildlife Service

Printed or typed name of protestant

whose post office address is 911 NE 11th Ave. Portland, OR 97232

Street No. or PO Box, City, State and ZIP Code

whose occupation is Chief, Water Resources Branch

and protests the granting

of Application Number 79275, filed on January 28, 2010

by Southern Nevada Water Authority to appropriate the

waters of Underground situated in White Pine

Underground or name of stream, lake, spring or other source

County, State of Nevada, for the following reasons and on the following grounds, to wit:

ALL COPIES MUST CONTAIN ORIGINAL SIGNATURE.

**ADDITIONAL INFORMATION TO SUPPORT THE PROTEST
OF THE U.S. FISH AND WILDLIFE SERVICE
IN THE MATTER OF APPLICATIONS 79267-79275**

Application Nos. 79267 through 79275 were filed by the Southern Nevada Water Authority on January 28, 2010 requesting a combined diversion rate of 70 cubic feet per second (50,678 ac-ft annually) from an underground source in Snake Valley, groundwater basin 195. The purpose of the proposed applications is municipal use. Basin 195 is part of the Great Salt Lake Regional Groundwater Flow System. The proposed groundwater wells are located up gradient from Fish Springs National Wildlife Refuge and have the potential to affect listed and unique species and habitats in Nevada and Utah.

The U.S. Fish and Wildlife Service (Service) requests that Application Nos. 79267 through 79275 be denied because:

1. Water is not available to appropriate in the manner described.
2. Granting of these applications will cause injury to Service-owned senior water rights for water on the Fish Springs NWR.
3. The proposed activity is not likely compatible with the purposes of the national wildlife refuge. Granting of these applications will threaten or damage habitat for species that are endangered, threatened, or considered for future listing under the Endangered Species Act and, therefore, is not in the public interest.

According to the Basin Summary for Basin 195 from the State Engineer's Office, the perennial yield is 25,000 ac-ft annually. The sum of the applied-for volume and the existing water rights exceeds the perennial yield for this basin.

The Service is also concerned about impacts to senior water rights at Fish Springs NWR. Fish Springs NWR is supported by groundwater discharge from the regional carbonate aquifer and all of the current spring discharges and associated surface water are protected through state appropriative water rights. Applications 79279 through 79295 would impact these senior water rights.

The proposed groundwater development is not in the public interest. The impacts from the proposed diversions will eventually and inevitably impact biological resources and endangered species at Fish Springs NWR and sensitive habitats in the Great Salt Lake Regional Groundwater Flow System.
