

IN THE OFFICE OF THE STATE ENGINEER OF THE STATE OF NEVADA

IN THE MATTER OF APPLICATION NUMBER 80035
FILED BY Patua Project, LLC
ON July 27, 2010, TO APPROPRIATE THE
WATERS OF Geothermal Reservoir

PROTEST

Comes now City of Fernley
Printed or typed name of protestant
whose post office address is 595 Silver Lace Blvd, Fernley, NV 89408
Street No. or PO Box, City, State and ZIP Code
whose occupation is political subdivision of the State of Nevada and protests the granting
of Application Number 80035, filed on July 27, 2010
by Patua Project, LLC to appropriate the
waters of Geothermal Reservoir situated in Churchill

Underground or name of stream, lake, spring or other source
County, State of Nevada, for the following reasons and on the following grounds, to wit:
See Exhibit A

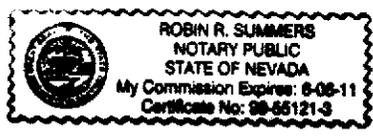

STATE ENGINEER'S OFFICE
2010 SEP 27 AM 11:29
RECEIVED

THEREFORE the Protestant requests that the application be Denied

Denied, issued subject to prior rights, etc., as the case may be
and that an order be entered for such relief as the State Engineer deems just and proper.

Signed Paul G. Taggart
Agent or protestant

Subscribed and sworn to before me this 27th day of September, 2010

Robin R. Summers
Notary Public
State of Nevada
County of Carson City

+ \$25 FILING FEE MUST ACCOMPANY PROTEST. PROTEST MUST BE FILED IN DUPLICATE.
ALL COPIES MUST CONTAIN ORIGINAL SIGNATURE.

Exhibit A

- 1) This application should be denied pursuant to NRS 533.370(5)
 - a. The application is for a consumptive use of water. The basin is fully appropriated, and committed water resources currently equal the perennial yield. Thus there is no unappropriated water in the proposed source of supply to support the application.
 - b. This application is seeking water near the basin boundary between Basin 76 and Basin 101. The proposed appropriation will conflict with existing rights. The City of Fernley's primary source for municipal supply originates from underground sources in adjacent Basin 76, the Fernley Area Basin. Granting water in excess of the current rights in the Carson Desert Basin, Basin 101, would exceed the perennial yield in that basin, and may negatively impact the municipal supply to the City of Fernley.
 - c. Such an approval would be detrimental to the public interest.
- 2) The proposed use conflicts with protectable interest in existing domestic wells and should be denied pursuant to NRS 533.024.
- 3) The application references that the water will be used for cooling of a binary geothermal power plant. Many binary geothermal power plants are air cooled when insufficient water is available. Thus, there is a less water intensive alternative that should be explored by the applicant. With viable alternatives that are less water intensive, there is no need to further tax the limited groundwater resource as proposed by the application and it should be denied.
- 4) The applicant has not demonstrated that such additional use of water would be environmentally sound. The current use constitutes an additional consumptive use of water in a fully appropriated basin. Withdraws in excess of existing rights will negatively impact valuable environmental resources. Also, the application calls for some of the used water to be injected back to the source. This may lead to degraded water quality in the area.
