APPLICATION FOR WATER NO. 83123

APPLICATION NO. 83123

VLOT REVOCABLE TRUST

WELL PERMIT NO. 12305 (SMITH, G.C.)

PROTEST

NOTICE IS HEREBY GIVEN, that on the 27th day of September 2013 2008 Vlot Revocable Trust of Chowchilla, California made application to the State Engineer of Nevada for permission to change the point of diversion, place and manner of use of 0.0067 c.f.s. of water heretofore appropriated under Permit 12305, Certificate 3679. Water will be diverted from an underground source at a point located within the SW1/4 NW1/4, Section 26, T12N, R23E, MDM or at a point from which the W1/4 corner of said Section 26 bears S 46 degrees 19 minutes 25 seconds W, a distance of 1,625.21 feet (approx. 3 miles E of Simpson, NV). Water will be used for commercial purposes from January 1st to December 31st of each year. The existing point of diversion was located within the SW1/4 SW1/4 of Section 36, T12N, R23E, MDM or at a point from which the SW corner of Section 12, T11N, R23E, MDM bears S 00 degrees 33 minutes 20 seconds W, a distance of 11,826.40 feet. Water was used for stockwater and domestic purposes from January 1st to December 31st of each year.

Jason King, P.E.
State Engineer

No. 17654 Oct 16, 23, 30, Nov 6, 2013

I protest the conversion of this well from stock watering to commercial, because the applicant will then apply for a great deal more acre feet of water than the 4.8 AFA currently permitted from that well in order to provide water for the dairy cows.

I protest the new point of diversion, which will allow Vlot Revocable Trust to use a great many more acre feet of water annually from this well on their property, located to the East of Hunewell Lane, to provide for the dairy herd.

I have been told that this well has not been used for many years. If true, then the permit has expired, and Vlot Revocable Trust would need to apply for a new permit, and increase the permitted water rights to exceed 1,200 AFA. I protest the granting of a new permit based on the drought conditions, and subsequent depletion of the aquifer, with no certainty that the aquifer will be recharged any time soon, if at all.
