of Application Number 83496

, filed on February 3

by Searchlight Land, LLC

for the

waters of underground

situated in Piute Valley

an underground source or name of stream, lake, spring or other source

County, State of Nevada, for the following reasons and on the following grounds, to wit:

A cursory Theis analysis was completed to assess the potential extent of pumping effects associated with the application point of diversion and requested pumping rate. The results of the analysis indicated that the extent of these effects would likely reach the S-2 municipal supply well within the 10-year pumping period, but that the magnitude of the effects would be relatively small. However, there is a paucity of reliable aquifer-property data for this area, therefore the results are uncertain and the effects could be greater.

As such, the Las Vegas Valley Water District requests that if the application is permitted, the permit be subject to prior rights and that groundwater monitoring in the vicinity of the production well be required as a condition of the permit.

THEREFORE the Protestant requests that the application be

Issued subject to prior rights and require monitoring

Denied, issued subject to prior rights, etc., as the case may be

and that an order be entered for such relief as the State Engineer deems just and proper.
