Exhibit "A"

Applications 84688 & 84689

The above referenced applications propose to appropriate 3000 acre-feet of ground water from the Dry Valley Hydro-graphic Basin.

State Engineer's ruling # 5568 determined a perennial yield of 3000 acre-feet for this basin.

Existing appropriations against the ground water resources of this basin are at or slightly over the yield estimate. Furthermore, the State Engineer's records indicate an additional 3400 acre-feet of pending applications within this basin.

NRS 533.370 (5) states that:

The State Engineer is prohibited by law from granting an application to appropriate the public waters of State of Nevada where:

- A. There is no unappropriated water at the proposed source;*
- B. The proposed use or change conflicts with existing rights;*
- C. The proposed use or change conflicts with protectible interests in the existing domestic wells as set forth in NRS 533.024; or*
- D. The proposed use or change threatens to prove detrimental to the public interest.*

Therefore, based on the foregoing Washoe County request that these applications be denied as granting them would be contrary to items A, B & D of the provisions of NRS 533.370 (5) listed above.
