Attachment to Protest #84829

The appropriation of water in Nevada is governed by statute which authorizes and requires the State Engineer to regulate such appropriations. Under NRS 533.370(3), the State Engineer must deny applications where there is no un-appropriated water in the proposed source or when the proposed use conflicts with existing rights or is detrimental to the public interest.

- 1) Currently LMWD has wells located in the Oreana Basin. Measurement of these wells shows a continued loss of static and operational levels. This can be attributed to the drought which is adversely affecting the available recharge. This has and will continue to cause the need for expansion of production area and generates increasing production costs to the consumers we provide services to. This must be minimized at all opportunities.
- 2) The District understands the issue surrounding the over allocation of rights within basins 73, 73A, & 72. It is proving to become a much larger issue and jeopardizes the economics of the communities that live there. Municipalities must continue to hold priority and protection for the availability of water, especially where rights are existent but must remain unused to guarantee the ability for growth. The basins aforementioned hold the greatest feasibility for the district to provide water to the consumers we currently and expect to have in the future. To exhaust the available recharge in any of these basins caps growth and requires the District to seek out very expensive alternative sources of water. LMWD uses 80% of the water granted to them within basin 73A and will reach 100% in the near future. LMWD is currently seeking sources of water from basins 72 to be able to keep up the anticipated demand that will occur upon the system.

Lovelock Meadows Water District expresses a deep concern that application #84829 by Meck-Tec Inc. would cause a significant impact upon the Districts ability to guarantee water for our consumers at an acceptable price. This application is detrimental to public interest and must be denied.

In accordance with the statute and argument aforementioned, Lovelock Meadows Water District submits this attachment to protest in opposition of the application #84829 by Meck-Tec Inc. and asks that the application be Denied.

“This institution is an equal opportunity provider and employer.”

Legal Notices

EN, that on the 10th day of February 2015, Lovelock Meadows Water District of Lovelock, Nevada, made application to the State Engineer of Nevada for permission to appropriate 2.0 c.f.s. (diversion rate only, no additional duty) of the public waters of the State of Nevada. Diversion is to be made from an underground source at a point located within the SE1/4 NW1/4 of Section 33, T29N, R33E, MDB&M, or at a point from which the SE corner of said Section 33 bears S 51 degrees 43 minutes 23 seconds E, a distance of 4,617.56 feet (approx. 2 miles due E of Creana, NV). Water will be used for municipal purposes from January 1st to December 31st of each year.
