Appointment No. 13-9223-V  
State of Nevada  
Nevada State of Nevada

Exhibit "A"

1. This Application is one of two (2) Applications filed by Rodney St. Clair seeking to appropriate and export some 14,241 acre feet of ground water from Hydrographic Basin No. 26. Diversion and export of such a quantity of water will unreasonably lower the static water level in the subject and related basins, adversely effect the quality of remaining groundwater and further threaten springs, seeps, and phreatophytes which provide water and habitat critical to the survival of wildlife, grazing livestock and other surface area existing use.
2. The granting of the subject Application with regard to interbasin flows will conflict with and adversely impact existing rights, including those of the Protestant.
3. There is no unappropriated water in the proposed source.
4. The subject Application was filed for purposes of speculation with no specified ultimate use or project and accordingly is not in the public interest.
5. The Applicant does not own or control the proposed place of use or right of way necessary to convey water to the proposed place of use.
6. The granting of the subject Application, particularly when considered with the other Application filed concurrently by this Applicant, will deprive the area of origin of water needed for its environmental and economic well being.
7. The proposed diversion and export of water from the source basin is not environmentally sound.
8. The Applicant lacks the financial capability for developing and transporting water under the subject Application and putting the same to beneficial use.
9. The subject Application should be denied because it individually and cumulatively with the other Application of this proposed project will exceed the safe yield of the source and related basins.
10. The granting or approval of the subject application would be detrimental to the public interest inasmuch as it may allow the Applicant to "lock up" vital water resources for speculative purposes.
