EXHIBIT A

2/26/2016

The proximity of this well will effect my own well ( LOG # 10707 ) along with my irrigation well ( permitt # 18676 ) which has dropped drastically from your report in November of 2015 it measured a water level of 35 Ft the reading in March of 2015 read a level at 28 Ft. I feel anyother well in this area will have a drastic effect on both my wells along with a well from the ranch I lease ( permit # 19873 ) With four new wells being allowed in the last four years ( two of O-N's, Peri & Sons, and Bitler Farms) I don't think the water level can withstand another well in this general area. With the lack of man power in your office I can't see you checking pumping rates.

I'm a small family own ranch I can't afford the expense of drilling of new wells. Also I point out that this well has been split once before( permit# 30259 ) I oppose the application for water # 85778 and 85779 or any new wells in this area.

Thank you for your consideration

David Giorgi DBA G Lazy B Partnership
