ALL COPIES MUST CONTAIN ORIGINAL SIGNATURE.

ATTACHMENT 1

The Protestant of this Application owns four Certificated water rights within the Mud Meadows Hydrographic basin. Based on the proximity of the proposed well locations to water rights owned by the Jackson Family, the Jackson Family is compelled to protest both Applications 8590 and 85902. The new Applications seek to appropriate 14,000 acre-feet of water from the Mud Meadows ground water basin and transfer it to the Fernley Area and Churchill Valley basins approximately 100 airline miles to the south. According to the Applications, the Applicant plans to construct a pipeline originating from land north of the Black Rock Desert, across said desert, and thence across lands controlled by the U. S. Bureau of Land Management, Pyramid Lake Indian Tribal lands, and other private lands. A detailed plan of how this pipeline would be built, maintained, and paid for was not addressed in the Application. This Protest will concentrate on concerns of the Jackson Family.

The proposed use threatens to prove detrimental not only to the Jackson Family, but also to the public interest (NRS 533.371 (6)). The Applicant has not cited a specific "Project" for utilizing water for Municipal Purposes under this Application. The Applicant is not a Public Entity, nor an authorized purveyor of water services, under Nevada Statutes.

The Applicant has not provided evidence of financial wherewithal to construct a pipeline of sufficient size and length to move 14,000 acre-feet of water over the distance to the Proposed Place of Use. Please refer to NRS 533.370 1 (c), (1) and (2), 2 and 3 (a), (b), (c), (d) & (e). Under NRS 533.370 4 (h), the Applicant does not have authorized entry permission from governmental agencies to move water via pipeline across public lands. Because the Point of Diversion of Applications 85901 and 85902 lie within the Black Rock National Conservation area, special use permits may be required from the U. S. Bureau of Land Management or other governmental agencies before approval of this Application. All Statutes under NRS 533.364 must be strictly followed. In addition, if this Application is approved, it would be subject to all the provisions under NRS 533.438.

The approval of Applications 85901 and 85902 and the subsequent pipeline building activities, would cause irreparable damage to the Jackson Ranch operations in Mud Meadows and the Black Rock Desert Conservation area.
