# INTRODUCTION

This inventory was prepared as an integral part of the Nevada State Water Plan under the direction of the Division of Water Resources and is an appendix to "Forecasts for the Future-Fish and Wildlife". The inventory is designed to provide a standard reference source on statistical data relative to the waters of the State of Nevada.

The statistical information contained herein was extracted by Robert E. Walstrom, Natural Resource Consultant, for the Division of Water Resources, from the stream and lake survey files of the Nevada Department of Fish and Game, the University of Nevada at Reno - Division of Agricultural Resource Economics, the files of the Nevada Division of Water Resources and other available publications. Basic lake and reservoir data were taken from "Water for Nevada, Water Planning Report No. 3", prepared by the Nevada State Engineer's Office, October 1971.

Every precaution was taken to insure the accuracy of the statistical data. However, it is recognized that possible errors do exist and much information is not available at present. Therefore, it is requested that corrected or additional information in respect to the waters of Nevada be sent to the Department of Conservation and Natural Resources, Division of Water Resources, 201 So. Fall Street, Carson City, Nevada 89701.

## KEY AND EXPLANATIONS TO COLUMNS

Two groups are set up within each hydrographic region. One group consists of "Streams" and the other consists of "Lakes, reservoirs and ponds".

In the "Stream" grouping there are 17 major columns which are described as follows:

1. No. - The survey number that was utilized by the University of Nevada at Reno, Division of Agricultural and Resource Economics for computerization of each water in Nevada for the report "Forecasts for the Future - Recreation", prepared for the Nevada Division of Water Resources as a part of the State Water Planning Program.

2. Stream Name - The most common local name of the water.

3. Valley or Mountain Range - The location of the water by valley or mountain range or nearest prominent landmark.

4. Twn and Rng - The reference location for the water by township and range.

5. County - The 17 Counties in the State of Nevada (Figure 1)

| | |
|---|---|
| Ca: Carson City | Li: Lincoln |
| Ch: Churchill | Ly: Lyon |
| Cl: Clark | Mi: Mineral |
| Do: Douglas | Ny: Nye |
| El: Elko | Pe: Pershing |
| Es: Esmeralda | St: Storey |
| Eu: Eureka | Wa: Washoe |
| Hu: Humboldt | Wh: White Pine |
| La: Lander | |

6. Hydrographic Area - The 232 subdivisions of the Hydrographic Regions as defined by the State Engineer's Office. Primarily these are sub-drainage systems within the 14 major drainage basins. (See Figure 1).

7. Date of Survey - The date that the stream survey was conducted by the Nevada Department of Fish and Game.

8. Biological Rating - A numerical rating system developed by the Nevada Department of Fish and Game for their use in evaluating a stream for cold water fishery purposes. See Pg.6 "Key to the Biological Stream Rating System for Cold Water Fisheries". As a general rule, the higher the numerical rating, the better the stream as a cold water fishery. The maximum rating obtainable with the system is 311.

9. Total Length - The length of an individual stream in miles and 10ths of miles from its source to its terminus or to where it joined another stream to which it was tributary.

10. Fishable Length - The length of a section of a stream in miles and 10ths of miles where game fish populations were found to occur.

11. Average Width - The mean width of a stream measured in feet, 10ths and 100ths of feet. The measurements were taken at several locations in the upper, middle and lower sections of the stream and averaged.

12. Average Depth - The mean depth of a stream measured in inches. The averages shown were determined from the measurements taken on the date of the survey and under the flow conditions that existed at that time. Several measurements were taken at several locations in the upper, middle and lower sections of the stream.

13. Average Flow - The mean flow in cubic feet per second of the stream determined from measurements taken on the date of the survey in several locations on the upper, middle and lower sections of the stream.

14. Average Minimum c.f.s. for Cold Water Fishery - The average minimum flow of water measured in cubic feet per second, necessary to maintain a cold water fishery as developed by Robert E. Walstrom, Natural Resource Consultant, for the Nevada Division of Water Resources. (See page 8 , "Key to the average Minimum c.f.s. for Cold Water Fisheries").

15. Ownership - Total - This indicates the miles of land, in miles and 10ths of miles, bordering the entire stream that is under the control of: 1. Forest Service, 2. Bureau of Land Management, 3. Private and 4. Others[1]

16. Ownership - Fishable Length - This indicates the miles of land, in miles and 10ths of miles, bordering the portion of the stream where a game fish population was found to occur that is under the control of: 1. Forest Service, 2. Bureau of Land Management, 3. Private and 4. Others.[1]

17. Game Fish Species - This lists those species of game fish that are known to occur in the body of water. The abbreviations can be interpreted by referring to - "Key to Game Fish Species", page 9

In the "Lakes, Reservoirs and Ponds" grouping there are 15 major columns which are described as follows:

1. No. - The same as for "Streams" above.
2. Lake, Reservoir or Pond - " " "
3. Valley Or Mountain Range - " " "
4. Twn and Rng - " " "
5. County - " " "
6. Hydrographic Area - " " "
7. Date of Survey - " " "
8. Average Width - The mean width of the body of water measured in miles (M) or feet (F).
9. Average Length - The mean length of the body of water measured in miles (M) or feet (F).
10. Average Depth - The mean depth of the body of water measured in feet and 10ths of feet.

---

1. Includes Bureau of Indian Affairs, Nevada Department of Fish and Game etc.

11. Maximum Depth - The greatest depth of the body of water measured in feet and 10ths of feet.

12. Surface Acres - Surface area in acres and 10ths of acres.

13. Volume-Acre Feet - Volume in acre feet and 10ths of acre feet.

14. Shoreline Ownership Percent - Based upon the surface area of the body of water, the approximate percentage of the shoreline that is under the control of: 1. Forest Service, 2. Bureau of Land Management, 3. Private and 4. Others.[1]

15. Game Fish Species - The same as for "Streams" above.

1. Includes Bureau of Indian Affairs, Nevada Department of Fish and Game, etc.

## KEY TO THE BIOLOGICAL STREAM RATING SYSTEM FOR COLD WATER FISHERIES[1]

There are 10 biological factors which determine the average cold water fishery. Each of these key factors must be considered, each with the others, in order to determine the quality of the stream for a cold water fishery.

All biological conditions vary in direct proportion to the descriptive rating with one exception. The numerical ratings for spawning conditions are reversed. For example, other environmental factors being equal a stream with good spawning conditions is assigned a lower overall rating than one with poor spawning conditions. This illustrates to the Department of Fish and Game the relative need for stocking each individual stream.

### BIOLOGICAL FACTORS

**VELOCITY** (feet per second)

| | | |
|---|---|---|
| 0.0 - 0.9 | (Sluggish) | - 3 points |
| 1.0 - 1.4 | (slow) | - 5 |
| 1.5 - 2.4 | (fast) | - 2 |
| 2.5 - 3.4 | (rapid) | - 0 |
| 3.5 - | (torrential) | - 0 |

**TEMPERATURE** (°F)

| | |
|---|---|
| 32 - 40 | - 0 points |
| 41 - 50 | - 2 |
| 51 - 55 | - 5 |
| 56 - 60 | -10 |
| 61 - 65 | - 5 |
| 66 - 75 | - 0 |
| 76 - | - 0 |

**VOLUME FLOW** (cubic feet per second)

| | |
|---|---|
| 0.00 - 0.25 | - 0 points |
| 0.26 - 0.50 | - 5 |
| 0.51 - 1.00 | - 10 |
| 1.01 - 2.00 | - 20 |
| 2.01 - 3.00 | - 40 |
| 3.01 - 4.00 | - 60 |
| 4.01 - 5.00 | - 80 |
| 5.01 - 6.00 | - 85 |
| 6.01 - 7.00 | - 90 |
| 7.01 - 8.00 | - 95 |
| 8.01 - 9.00 | -100 |
| 9.01 -10.00 | -105 |
| 10.01 - | -105 |

**BOTTOM TYPE**

| | |
|---|---|
| Rock or rubble | -10 points |
| Gravel | - 6 |
| Sand | - 2 |
| Mud | - 2 |
| Hardpan | - 0 |
| Bedrock | - 0 |
| Clay | - 0 |

**TURBIDITY**

| | |
|---|---|
| Clear | - 2 |
| Cloudy | - 1 |
| Murky | - 0 |
| Muddy | - 0 |

**OTHER FACTORS**

| | Ex. | Gd. | Fr. | Pr. |
|---|---|---|---|---|
| Pools | 75 | 50 | 25 | 0 |
| Cover | 50 | 30 | 10 | 0 |
| Riffles | 4 | 3 | 2 | 0 |
| Spawning | 0 | 10 | 15 | 20 |
| Food | 30 | 20 | 5 | 0 |

1. Developed by the Nevada Department of Fish and Game, Fisheries Division.

## KEY TO THE AVERAGE BIOLOGICAL STREAM RATING FOR COLD WATER FISHERIES[1]

A biological rating system was developed from examination of nearly 400 streams in the stream survey file of the Nevada Fish and Game. Each stream was rated from 0 to 311, according to the quality of the various biological factors. The table below is an average biological rating only and any serious degrading of any one of the elements could very well preclude a fishery even though the over-all rating may be average or above. For example, on a 10 foot stream with a biological rating of 166, which would indicate an average cold water fishery, the turbidity or velocity could be such that no fishery could exist.

### BIOLOGICAL RATING

| Average Width (Feet) | Average[2] Biological Rating (0 - 311) |
|---|---|
| 1 | 58 |
| 2 | 72 |
| 3 | 85 |
| 4 | 99 |
| 5 | 111 |
| 6 | 125 |
| 7 | 137 |
| 8 | 147 |
| 9 | 157 |
| 10 | 166 |
| 11 | 173 |
| 12 | 180 |
| 13 | 186 |
| 14 | 190 |
| 15 | 194 |

1. Developed by Robert E. Walstrom, Natural Resource Consultant. from data (1951 to 1970) obtained from the Nevada Department of Fish and Game and available publications.

2. The average cannot be construed as a limit.

KEY TO THE AVERAGE MINIMUM C.F.S. FOR

COLD WATER FISHERIES[1]

This table lists the recommended average cubic feet per second required for a cold water fishery on streams up to 15 feet in width. The table is based on the examination of over 500 streams and their associated average minimum flows and compiled from published reports and estimates of Nevada fish and game field personnel.

Cubic Feet Per Second Requirement

| Average Width (Feet) | Average Minimum[2] Cubic Feet Per Second |
|---|---|
| 1 | 0.2 |
| 2 | 0.6 |
| 3 | 1.2 |
| 4 | 1.8 |
| 5 | 2.3 |
| 6 | 3.0 |
| 7 | 3.7 |
| 8 | 4.4 |
| 9 | 5.1 |
| 10 | 5.9 |
| 11 | 6.7 |
| 12 | 7.6 |
| 13 | 8.4 |
| 14 | 9.3 |
| 15 | 10.2 |

1. Developed by Robert E. Walstrom, Natural Resource Consultant, from data (1951 to 1970) obtained from the Nevada Department of Fish and Game and available publications.

2. The average cannot be construed as a limit.

## KEY TO THE GAME FISH SPECIES

| | |
|---|---|
| B | Bluegill |
| BB | Black Bullhead |
| BC | Black Crappie |
| BT | Brook Trout |
| BNB | Brown Bullhead |
| BNT | Brown Trout |
| CC | Channel Catfish |
| CT | Cutthroat Trout |
| DT | Dolly Varden Trout |
| GT | Golden Trout |
| GS | Green Sunfish |
| KT | Kokanee Salmon |
| LB | Largemouth Black Bass |
| MT | Mackinaw Trout |
| NP | Northern Pike |
| RT | Rainbow Trout & Rainbow Hybrids |
| SP | Sacramento Perch |
| ST | Silver Salmon |
| SB | Smallmouth Black Bass |
| STB | Striped Bass |
| WP | Walleye |
| W | Whitefish |
| WBA | White Bass |
| WC | White Catfish |
| WCR | White Crappie |
| YP | Yellow Perch |

End. Species Rare and Endangered Species

## TOTALS FOR NEVADA - ALL WATERS

It must be noted that totals represent only those figures available for tabulation on individual waters. Some figures are not available at present on certain waters and these totals will be updated as they become available. Additionally, it should be noted that the totals include fishable as well as nonfishable waters.

| STREAMS | | |
|---|---|---|
| No. | Total Length (miles) | Species of Game Fish |
| 1,122 | 7,500 | 22 |

| LAKES, RESERVOIRS AND PONDS | | | |
|---|---|---|---|
| No. | Surface Acres[1] | Volume (Acre-feet) | Species of Game Fish |
| 384 | 425,400 | 185,734,600 | 25 |

| TOTALS - ALL WATERS | |
|---|---|
| No. | Species of Game Fish |
| 1,506 | 26 |

1. Includes only Nevada portions of Lakes Mead, Mohave, Tahoe and Topaz.

Total length, surface acres and volume rounded to nearest 100.

| STREAMS - TOTALS BY HYDROGRAPHIC REGION | | | |
|---|---|---|---|
| Hydrographic Region | No. | Total Length[1] (Miles) | Species of Game Fish |
| 1 | 11 | 110 | 2 |
| 2 | 59 | 530 | 4 |
| 3 | 301 | 1,600 | 7 |
| 4 | 327 | 2,920 | 15 |
| 5 | 4 | 20 | 7 |
| 6 | 35 | 220 | 8 |
| 7 | - | - | - |
| 8 | 34 | 240 | 14 |
| 9 | 14 | 220 | 12 |
| 10 | 266 | 1,180 | 5 |
| 11 | 52 | 280 | 4 |
| 12 | - | - | - |
| 13 | 18 | 210 | 8 |
| 14 | 1 | - | - |

1. Rounded to nearest 10.

| LAKES, RESERVOIRS AND PONDS - TOTALS BY HYDROGRAPHIC REGION | | | | |
|---|---|---|---|---|
| Hydrographic Region | No. | Surface Acres | Volume (Acre -feet) | Species of Game Fish |
| 1 | 47 | 21,290 | 43,570 | 5 |
| 2 | 21 | 3,210 | 19,000 | 7 |
| 3 | 27 | 8,210 | 109,870 | 8 |
| 4 | 64 | 27,980 | 358,050 | 18 |
| 5 | 1 | 410 | - | 7 |
| 6 | 41 | 151,930[1] | 150,051,230 | 15 |
