

IN THE MATTER OF APPLICATION)
28861 FILED BY PHILIP BENJAMIN)
TO APPROPRIATE THE WATERS OF AN)
UNDERGROUND SOURCE LOCATED IN)
CLARK COUNTY, NEVADA.)

R U L I N G

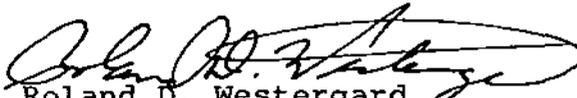

GENERAL:

On August 27, 1974, a map to support an application to appropriate the waters of the State of Nevada was received in this office via certified mail (no. 154) in a standard mailing tube used to mail linen tracings. The map was submitted on behalf of Philip Benjamin. Receipt of the map was made on the records of the State Engineer's office and as is standard procedure, the map was held pending receipt of the application to appropriate and filing fee. On November 1, 1974, in response to an inquiry by Philip Benjamin, a search was made for the application and filing fee which apparently had been submitted with the linen tracing. The application and filing fee were discovered attached to the outside of the map mailing tube and were in fact received on August 27, 1974, the same day as the linen tracing supporting said application.

RULING:

This ruling will serve as a finding and notice that the priority date of Application 28861 is established as August 27, 1974.

Respectfully submitted,

Roland D. Westergard
State Engineer

RDW: PGM: cm

Dated this 13th day of
December, 1974.
