Attn: Dean Goodall

Dear Dean,

On January 31, 1990 we plugged a water well for the Sands Hotel, permit number #14019. The well had 10-3/4" diameter casing, and was originally 700 feet deep. We found that the well had collapsed closed at a depth of 445 feet. We perforated from 445 feet up to 100 feet, and placed in approximately 9 yards of cement slurry. The static water level was measured at 105 feet.
