 New Well  Replace  Recondition  Deepen  Abandon  Other \_\_\_\_\_  
 4. PROPOSED USE  
 Domestic  Irrigation  Test  Municipal/Industrial  Monitor  Stock  
 5. WELL TYPE  
 Cable  Rotary  RVC  Air  Other \_\_\_\_\_

6. LITHOLOGIC LOG

Material	Water Strata	From	To	Thickness
We abandoned this well by fishing a cement rock that had fallen into the well on top of the 10" column pipe from the turbine pump that had fallen into the well. We then tried to "fish" the turbine pump. We got a hold of the pump twice and pulled 41,000 lbs trying to remove it. At 42,000 the fishing tool came off the pump. We then placed tremie pipe as far as we could, 465'. We then pumped 18 cu. yards of neat cement into the well and the cement came to up to 260'. We then poured approximately 15 yards of gravel into the well to 22'. We then poured 1.5 cu. feet of 7 sack sand grout to top off the seal. We then removed the 2' x 16" extension that was placed on the well for the abandonment. Perforations shown are in addition to original perforations.
