Division of Water Resources  
901 South Stewart Street  
Carson City, NV 89701

Subject: **Monitoring Well Abandonment**  
**Former Shell Gas Station (Beeghly Shell)**  
**275 West Williams Avenue**  
**Fallon, Nevada**  
**Facility ID-5-000024; Petroleum Fund Case ID-2005000010**

To Whom It May Concern:

The above mentioned site has been under going remediated since 2004. During that time Converse Consultants (Converse) installed a total of is six monitoring well (MW-1- MW-6) at the site. On September 26, 2007, Converse excavated contaminated soil as required by the Nevada Division of Environmental Protection (NDEP). The excavation was taken down to groundwater. **MW- 4 was destroyed during the excavation of the contaminated soil. All well components were removed with the back hoe and the area was backfilled with the larger excavation.**

On November 13, 2007, Converse sampled the remaining monitoring wells, with the exception of MW-1, which had been blocked with a semi-permanent storage container. After the sampling site closure was requested from NDEP. On November 29, 2007, NDEP sent a letter to Great Basin College Foundation, the responsible party for the remediation, stating that no future assessment or remediation was required at the site.

Converse, on behalf of the Great Basin College Foundation, retained Pezonella, a Nevada licensed well driller, to abandon the monitoring wells at the site. On January 9 and 10, 2008, MW-2, MW-3, MW-5, and MW-6 were abandoned. Converse asked the property owner's representative, Rodger Singh, if there was anyway that the semi-permanent storage container that was blocking MW-1 could be moved, so the MW-1 could be abandon. He explained that the container was full and could not be moved. Converse explained that if and when the container could be moved it would be the properties owner to properly abandon MW-1.

If you have any questions about the information presented above, please contact our office at 775-753-6266.

Respectfully submitted,

CONVERSE CONSULTANTS
