TMWA was ordered to plug well. We removed cement pad and cut off 4"x 16" cap off of well. We then conducted a video of the well. We touched bottom of the well at a depth of 632'. We then installed our bailer and cleaned out the debris to 647'. We then perforated the 16" casing from 192' to surface. After perforating, we installed 630' of 2" tremmie pipe and pumped in approximately 40 yards of neat cement.
