6 Additional Notes or Comments
Conducted video of well in early spring. Found casing to have large perforations and large holes in it. Spoke with Tim Hunt and due to the well not having any gravel pack, allowed us to use a 6 sack sand mix for grout. We installed 2" tremmie pipe and pumped in 10 yards of cement grout. After grout was at 20' from surface, we left set overnight and placed 20' neat cement seal from 20' to surface.
