5 WATER LEVEL  
Static water level 72.6' feet below land surface  
Artesian flow   G.P.M. P.S.I.  
Water temperature   °F Quality  

6 Additional Notes or Comments  
Measured static water level at 72.6'. Measured depth of well at 450'. Installed 6" Mills Knife to 100' and perforated 4 rows per foot from 100' back to 51'. We could not penetrate beyond this point because of the cement seal. We removed Mills Knife and ran tremme to 450' and blew debris from well to depth of 458'. We then pumped in approximately 6 yards of neat cement from bottom of the well to surface. The casing was then cut off 2' below ground level.
