6. LITHOLOGIC LOG

Material	Water Strata	From	To	Thickness
<u>BSMNH#8</u>				
<u>To much time was lost in drilling this hole because of lack of drilling water and lack of enough material to case it when completed to 537 feet.</u>				
<u>ON Sept 15 2010 we had reentered the hole to bottom after coming back from Reno with more casing to complete the well.</u>				
<u>Installed 2' juv to 400' ft and the casing stopped, hole closed shut.</u>				
<u>Reentered hole using mud to open it back up to 537 ft.</u>				
<u>Cleaned to bottom and tools were free, pulled up 20 ft. Took off 20 foot drill pipe. Pulled up 3 ft and tools stuck. Hole collapsed, at 3 pm tools would not rotate or go up or down. Called Hamilton Reed at water resources. Told him we had lost the hole and some tooling probably.</u>				
<u>Called blaster to shoot tools off. placed shot at 520' tools didn't shoot off.</u>				
<u>placed another shot would 90 feet 280' ft.</u>
