7 WELL PLUGGING PROCEDURE	
Was well cleaned out to total depth? <input checked="" type="checkbox"/> yes <input type="checkbox"/> no	
If well was not cleaned out to total depth, please explain why: _____	

Existing Perforations:

Type of perforation	<u>n/a</u>
Size of perforation	<u>n/a</u>
From _____	feet to _____ feet
From _____	feet to _____ feet
From _____	feet to _____ feet
From _____	feet to _____ feet
From _____	feet to _____ feet

Was the well contaminated? <input type="checkbox"/> yes <input checked="" type="checkbox"/> no
Was the casing pulled? <input type="checkbox"/> yes <input checked="" type="checkbox"/> no
Was the casing over drilled? <input type="checkbox"/> yes <input checked="" type="checkbox"/> no
If casing was left in place, please show where additional perforations were made: Additional Perforations: _____
Type of perforator used: <u>Mills Knife</u>
From <u>63</u> feet to <u>5</u> feet Number of perfs per linear foot <u>4</u>
From _____ feet to _____ feet Number of perfs per linear foot _____
From _____ feet to _____ feet Number of perfs per linear foot _____
From _____ feet to _____ feet Number of perfs per linear foot _____
From _____ feet to _____ feet Number of perfs per linear foot _____
From _____ feet to _____ feet Number of perfs per linear foot _____

5 WATER LEVEL			
Static water level <u>10.2</u> feet below land surface			
Artesian flow _____ G.P.M. _____ P.S.I.			
Water temperature _____ °F Quality _____			

8 WELL PLUGGING MATERIALS			
Material Used			
From <u>85</u> feet to <u>25</u> feet	<u>abandonite</u>	<input checked="" type="checkbox"/> Pumped	<input type="checkbox"/> Poured
From _____ feet to _____ feet		<input type="checkbox"/> Pumped	<input type="checkbox"/> Poured
From _____ feet to _____ feet		<input type="checkbox"/> Pumped	<input type="checkbox"/> Poured
From _____ feet to _____ feet		<input type="checkbox"/> Pumped	<input type="checkbox"/> Poured
From _____ feet to _____ feet		<input type="checkbox"/> Pumped	<input type="checkbox"/> Poured

6 Additional Notes or Comments

**WELL #3**

Measured static water level at 10.2' and depth of well at 80'. Installed 2" tremmie pipe and blew debris from well to a depth of 85' where we hit a hard bottom. Installed Mills Knife to 63' and perforated 4 rows per foot from 63' to surface. We removed Mills Knife and installed 2" tremmie pipe to 80'. We mixed 8 bags of Abandonite with approx. 280 gallons of water to get the mud weight to 9.2 lbs. per gallon. We then pumped the fluid from the bottom of the well to surface. The well was allowed to set idle over night and the following day the mud had settled down 6'. We bailed off the mud to 25' and installed 1 bag of hole plug for our bridge plug. We then mixed 5 bags of cement with 25 gallons of water and pumped in our surface seal.
