8 WELL PLUGGING MATERIALS

6 Additional Notes or Comments  
Inserted drill bit to 82' and began drilling. Immediately encountered resistance. Continued drilling for one hour and made no depth. Pulled drill bit to examine and found deep gouges on its surface. We believe the well is collapsed and the pump system is still in the well. Perforated from 82' to 50'. Couldn't perforate above 50' due to surface seal.
