6. Additional Notes or Comments
There was no well log for this well. We found a 6 5/8" well at 380'. Water level 372'. There was no annular seal. We poured approximately 1.5 yards of neat cement into the annular space between the casing and drilled hole. We poured approximately 3.5 yards of neat cement into the well to top it off. We tried to perforate the casing without success. We removed a pump that was in the well on 1.5" galv. pipe from bottom to top and had a sanitary well seal protecting the inside of the well casing.
