Depth (fbs)	Ground Water Level	Lithologic Symbol	Lithologic Description	Well Construction
0		ASPHALT		
0 - 20		[Dotted pattern]	Silty Well-Graded Sand and Gravel (SW-GW). Moist, dense, brown. 50% fine to coarse, angular sand. 40% fine to coarse, angular gravel. 10% silt minor clay.	[Well casing and screen diagram]
20 - 30	▼	[Dotted pattern with circles]	Clayey Well-Graded Sand and Gravel (GW-GW). Moist, very dense, low plasticity, brown. 40% fine to coarse, angular, sand. 40% fine to coarse, angular, gravel. 20% clay. Wet at 22' Large cobbles at 25'	[Well casing and screen diagram]
30 - 32	TD			

Driller: Cascade
 Drilling Method: Sonic
 Date: 1/13/2015
 Borehole Diameter: 7"
 Well Diameter: 2"
 Boring Angle: Vertical
 Screen Size: 0.02 in.
 Screen Pack: #3 Mesh Sand

Northing: 14867532.41
 Easting: 2291426.22
 TOC Elev: 4427.18

NOTE:
 Lithology based on soil cuttings
