<u>Gravel pack #1</u>				
<u>was drilled to 235' where it intersected original gravel pack - we filled with gravel, back to 50' and cemented to surface and then started gravel pack #2 - to a depth of 30' at this time it was decided to discontinue and to pump well at excessive water hoping it would clear up. This well is pumping approx. 800 gal a minute, and with each stop and start it pumps some clay - if it does not clear up we may complete gravel pack #2 -</u>
