The open well bore and monitoring well located in the SW 1/4 of the SE 1/4 of Sec 30, T18N, R20E in Washoe County were filled in to the specified requirements of Dick Whiting of the Nevada Department of Minerals.

The open well bore was filled in from 150 feet to 2 feet of the top with cement slurry. The monitoring well, which is cased, was topped off with cement slurry from 50 feet to the surface and was capped so it could be monitored.

Sincerely,

Chuck Stuart
