Re: Replacement well for Beatty Water and Sanitation District in SW 1/4 NW 1/4 Section 26, T.11S., R. 46E., M.D.M. Nye County Nevada. Permit # 38126.

Dear Mr. Gallager:

PLUG

In reference to your letter to the Beatty Water and Sanitation District about plugging the existing well drilled under permit # 38126 after the replacement well was drilled in September of 1988.

At the time the replacement well was drilled I was the manager of the District and upon setting a pump in the new well the pump was pulled in the old one. I then ran a 1 inch pipe in the well and backfilled with chlorinated pea gravel to within 50 feet of the surface, then cemented the remaining 50 feet to the surface. The 1 inch pipe was installed so we could use it as a monitoring well.

I thought that I had notified the Division of Water Resources on plugging the well, not finding any record of notification I must have inadvertently failed to notify you.

Sincerely,

Marvin J. Walker
