BOX 402
WELLS, NEVADA

Log No. 37459

Permit No. _____

Basin 42

Insert No. _____

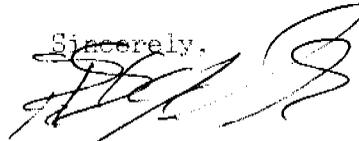

Michael Anderson
State Engineers Office
123 Nye Lane
Carson City, Nevada

Dear Mr. Anderson:

This letter is in reference to a well (hole) plugged
11/20/91, located in the SE1/4 NE1/4 sec. 26 T38 R59.
The "well" involved was a 36 inch diameter culvert buried 11
ft. vertical inside of a building. The building sits on a
concrete pad which also surrounds the well. Perforations were
toreh out starting from 5 ft. from the surface to,
presumably, the bottom, but at least to static (10ft.)

Abandonment procedures were not extensive, we filled the
hole from the surface to the surface with cement grout.

Sincerely,

R.D. Reynolds
